

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

The Latin root of agriculture is agri,or "field," plus cultura, "cultivation." Cultivation a piece of land, or planting and growing food plants on it,is largely what agriculture means.

India is the world's largest producer of milk,pulses and jute,and ranks as the second largest producer of rice,wheat,sugarcane,groundnut,vegetables,,

These agriculture quotes will inspire you. Agriculture is the science or practice of farming,including the cultivation of the soil for the growing of crops and the rearing of animals to provide food,wool,and other products.

Growing up on a farm,I realized that farming is a full-time job,even if my father called it hobby farming. Farming involved the entire family working together as a team.

Farming is a risky business that depends mostly on one element that cannot be controlled;the wheather.

Methodical planning and refinement enable farmers to gain the greatest yield possible.There is a time to reap and a time to sow.Perfect timing is everything.

Persona’s name

Short summary of the persona

Agriculture research tends to follow discrete approaches which reflect the very different disciplines involved.

investigation of the human aspects of agriculture has been mainly of an economic nature but the quite different social approach has grown more recently.

Agriculture geography in the first half of this century was largely subject to the paradigm of enviremental determinism, in that its function was seen as being primarily that of interpreting the relationships between farming patterns and their physical environments.

You're probably aware that agriculture is one of America's most hazardous industries.Compered to other occupations,farmers as well as their family members have an elevated risk of fatal and nonfatal injuries.

What you may not realize is that agriculture exposes workers to more than just physical health hazards.farming and the unique challenges it poses can lead to issues like chronic stress,anxiety and depression.

Think of stress as the body's responce to real or perceived threats.Stress can be either acute or chronic.The main difference between chronic stress and acute stress is the length of time that the response lasts in the body.

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
